

ALGENIUX

Top quality alginate with a new and refined formulation to achieve the maximum level of detail reproduction, optimal elasticity and tear resistance when taking the impression. Thanks to the M.A.P. technology (modified atmosphere packaging) the product shelf life is 6 years. The excellent dimensional stability allows casting of the impression after 5 days (if correctly stored in sealed container). Available in fast or normal setting.

MAIN FEATURES:

- Aroma: Mint.
- Color: Pink.
- Superior elasticity and tear resistance.
- Stabilized hypoallergenic formula.
- High flow and easy mixing.
- Excellent biocompatibility.
- Dust free powder for safe working and cleaning ease.
- Excellent gypsum compatibility.
- Very high compressive strength and recovery from deformation.

TECHNICAL DATA:

- Mixing Time: 35" at 23°C
- Working Time:
 - Normal setting: 1' 40" at 23°C
 - Fast setting: 1' 30" at 23°C
- Setting Time:
 - Normal setting: 3' 00" a 23°C
 - Fast setting: 2' 30" a 23°C
- Shelf Life: 6 years (MAP technology).

A7010	Algeniux - Normal setting	10 x 453 g
A7024	Algeniux - Normal setting	24 x 453 g
A7110	Algeniux - Fast setting	10 x 453 g
A7124	Algeniux - Fast setting	24 x 453 g

ALGINPLUS

Extra-high precision alginate for impressions with chromatic phase indicator. Enriched formula for enhanced details reproduction.

- Stabilized hypoallergenic formula.
- Chromatic indication of the working phases for easy and precise results.
- Dust free powder for safe working and cleaning ease.
- High flow and easy mixing.
- Excellent gypsum compatibility.
- Very high compressive strength and recovery from deformation.

- Aroma: tropical fruit.
- Final color: yellow.
- Setting time: 2'00" at 23°C
- Shelf life: 6 years.
- Excellent biocompatibility.

A6010	Alginplus	10 x 453 g
A6024	Alginplus	24 x 453 g

ALGINMAX

High precision alginate for impressions with chromatic phase indicator.

- Stabilized hypoallergenic formula
- Chromatic indication of the working phases for easy and precise results.
- Dust free powder for safe working and cleaning ease.
- High flow and easy mixing.
- Excellent gypsum compatibility
- Very high compressive strength and recovery from deformation.

- Aroma: vanilla-mint or fruit.
- Final color: pale blue
- Setting time: 2'00" a 23°C
- Shelf life: 6 years
- Excellent biocompatibility

A2010	Alginmax (vanilla-mint)	10 x 453 g
A2024	Alginmax (vanilla-mint)	24 x 453 g
A2110	Alginmax (fruit)	10 x 453 g
A2124	Alginmax (fruit)	24 x 453 g

ALGINMAJOR

Precision alginate for impressions.

- Stabilized hypoallergenic formula.
- Dust free powder.
- High flow.
- Excellent gypsum compatibility.
- Very high compressive strength and recovery from deformation.
- Aroma: orange.
- Color: orange.
- Setting time: 2'00" a 23°C
- Shelf life: 6 years.
- Excellent biocompatibility.

A1010	Alginmajor	10 x 453 g
A1024	Alginmajor	24 x 453 g

ALGINKID

High resistance alginate for orthodontic impressions.

- Stabilized hypoallergenic formula
- Dust free powder for safe working and cleaning ease
- Excellent gypsum compatibility
- Very high compressive strength and recovery from deformation.
- Aroma: orange.
- Color: yellow.
- Setting time: 1'50" a 23°C
- Shelf life: 6 years
- Excellent biocompatibility
- High flow and easy mixing.

A3010	Alginkid	10 x 453 g
A3024	Alginkid	24 x 453 g

ALGINPLUS TROPICAL

High precision alginate for impressions with chromatic phase indicator. Innovative advanced formula for tropical climates and hot environments.

- Stabilized hypoallergenic formula.
- Chromatic indication of the working phases for easy and precise results.
- Dust free powder for safe working and cleaning ease.
- Excellent gypsum compatibility.
- Very high compressive strength and recovery from deformation.
- Aroma: tropical fruit.
- Color: yellow.
- Setting time: 3'20" a 23°C
- Shelf life: 6 years.
- Excellent biocompatibility.

A5010	Alginplus Tropical	10 x 453 g
A5024	Alginplus Tropical	24 x 453 g

SPATULAS

Nylon spatulas for alginates.
